Summary

Skilled Java Full-Stack Developer with 4+ years of experience in developing scalable enterprise applications using Java, Spring Boot, Microservices, React.JS, and AWS. Proven expertise in modernizing legacy systems, building RESTful APIs, and deploying microservices in cloud-based environments. Adept at working in Agile teams and delivering high-performance solutions. Seeking to contribute to a fast-paced, innovative product company.

Experience

December 2021 - Current
Mumbai, Maharashtra, India

Software Engineer (Full-Stack Java)
HOC INDIA PVT. LTD.

- Migrated the legacy **EJEMS 3X** platform from Java Swing to a scalable, **microservices**-based architecture using Spring Boot and React, enhancing performance and user engagement by 40%.
- Developed and deployed multiple RESTful microservices using **Spring Boot, Spring Data JPA, and Spring Cloud**, enabling seamless modularization and inter-service communication via Eureka and Feign Client.
- Implemented Spring Cloud Config for centralized configuration management and Resilience4j for fault tolerance and circuit breaking, ensuring high availability.
- Designed clean and secure API layers with **JWT-based authentication**, reducing response time by 25% and improving overall system security.
- Integrated Jasper Reports within backend microservices to automate reporting processes, saving 15+ hours per month and improving analytics accuracy.
- Followed Agile practices and maintained high-quality code through peer reviews and rigorous unit testing using JUnit and Mockito, achieving 95%+ code coverage.
- Collaborated with cross-functional teams for DevOps integration, **CI/CD setup**, and cloud-readiness of backend services.

July 2019 - December 2021
Mumbai, Maharashtra, India

System Analyst
INFINX SERVICE PVT. LTD. -

- Enhanced SQL queries for data retrieval, decreasing latency by 25% and increasing report accuracy.
- Engineered Java modules for inventory tracking, minimising manual errors by 30%.
- Engaged with cross-functional teams to establish project goals and optimise workflows.

Certifications

- Advance Java Professional Specialist, Squad InfoTech Thane, CT_SO_1121
- ReactJS, Udemy
- JavaScript, Coursera ,AI technology, OpenAI, Copilot

Projects

◆ EJEMS 3X (Legacy System)

Tech Stack: Java EE, Swing, Jasper Reports, SQL

Maintained and enhanced legacy Java Swing modules for jewelry inventory, sales, and reporting.

Automated critical business reports using Jasper Reports, reducing manual reporting time by 50%.

Managed SQL database for 5K+ items with 99.9% accuracy and integrity.

◆ Premate (Online Course Platform)

Tech Stack: Spring Boot, React, JavaScript

Developed backend APIs for course and user management using Spring Boot and JPA.

Integrated dynamic form handling and validation in React, reducing form submission errors by 45%.

Designed secure login flow and implemented session management for authenticated access.

◆ Ring Builder App (Shopify App)

Tech Stack: React, Node.js, Shopify API, Liquid

Built a Shopify app enabling jewelry stores to offer customizable ring-building features, increasing user engagement by 50%.

Languages

Marathi: C2	 (Proficient)
Hindi: C1	 (Advanced)
English: B1	 (Intermediate)

Hobbies and interests

- Singing and playing guitar (acoustic & electric)
- Traveling and exploring new cultures
- Reading non-fiction and tech innovation books
- Engaging with music and art communities
